EDUCATION

Vidyalankar Institute of Technology BTech. Computer Engineering CGPA - 9.81	2023-Present
B.K Birla College of Arts, Science and Commerce PCM, Computer Science 72.83%	2021-2023
Guru Nanak English High School, Kalyan SSC 94.60%	2014-2021

TECHNICAL SKILLS

Programming Languages: Python, Java, C

AI / Machine Learning: Machine Learning, Deep Learning, CNN, Vector Embeddings, Semantic Search, Retrieval-Augmented Generation (RAG), Feature Engineering, Model Evaluation, Data Preprocessing

NLP: Text Processing, Tokenization, Embeddings, Similarity Search

Frameworks & Libraries: TensorFlow, Scikit-learn, Pandas, NumPy, Matplotlib, React.js, Tailwind CSS

Databases & Storage: PostgreSQL, MongoDB, SQLite, pgvector

Backend & APIs: Node.js, Express.js, REST APIs

Tools & Platforms: Git, GitHub, Postman, VS Code, Vite, Render, Vercel

Frontend: HTML5, CSS3, React.js, React Hooks, Tailwind CSS

WORK EXPERIENCE

Web Developer Intern at DreamVentz

Jan 2026 – March 2026

- Developed and integrated RESTful APIs using Node.js and Express.js for 3+ core event-tech features with database connectivity and backend logic handling.
- Built 5+ responsive React.js components with dynamic routing and React Hooks, while contributing to debugging, code reviews, and production deployment in a team-based workflow.

PROJECTS

PaperLens – AI Research Paper Discovery System

March 2026

Python, pgvector, PostgreSQL, LLM APIs

Built semantic search system using embeddings and pgvector to retrieve research papers with LLM-based summarization for faster understanding and insights

Curely – Centralized Healthcare System

Aug 2025

Python, TensorFlow, CNN, Flask, React.js

Developed a healthcare platform integrating multiple CNN models for brain tumor, skin disease, and oral cancer detection along with diabetes prediction

AlumniNexus – Full Stack Alumni Networking Platform

May 2026

MongoDB, Express.js, React.js, Node.js, Tailwind CSS, LiveKit API

Developed an alumni networking platform with mentorship, opportunities, applications, and role-based authentication using the MERN stack.

HACKATHONS

INSPIRON 4.0 at COEP, Pune

March 2025

Developed LangSQL, a novel solution integrating language and database interaction to simplify query execution and enhance accessibility.

TYNET 2.0 International Women Hackathon, RAIT

Jan 2025

Gamified web app that offers emotion-based education, bilingual support, and cultural gamification, which increases self-assurance and fosters connections.

ACHIEVEMENTS

Tata Elxsi TELIPORT Season 3 – Semi-Finalist (National Level)

Selected in top 73 teams among 43,000+ registrations and 6000+ submissions; developed an AI-based autism screening system using multimodal data, CNN-LSTM models, and explainable AI for support.

EXTRACURRICULARS

Computer Society of India: Active member contributing to events, documentation, and student engagement.

Google Developer Groups: Participated in tech sessions, workshops, and community-driven learning initiatives.
